# ((12B100/R)) LOW FREQUENCY

The 12 B100/R is a high compliance, bass loudspeaker, featuring wide, single polyurethane foam roll, a 4" voice coil diameter, and a massive, powerful magnet system. These ensure excellent efficiency and extended low frequency response. This model has been designed for use in bass-reflex or closed enclosures, in high quality multi-way systems.

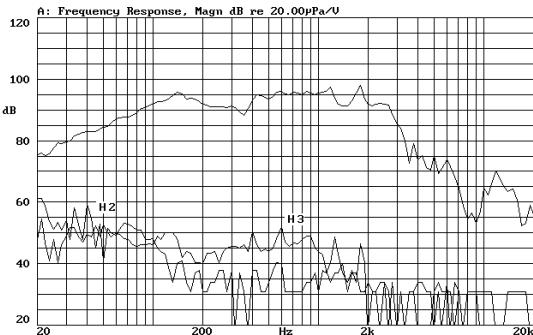

Este altavoz de 12" de alta elasticidad, diseñado para aplicaciones de subwoofer o de graves, está dotado de una suspensión de espuma de media caña que le permite una elongación importante, y bobina de 4" de hilo plano movida por un circuito magnético de gran tamaño que le asegura una amplia respuesta en frecuencia con unos bajos profundos y contundentes. Diseñado para una utilización en recintos bass-reflex de sistemas de gran calidad.

## SPECIFICATIONS

Nominal diameter	300 mm. 12 in.
Rated impedance	8 ohms.
Power capacity*	150 w RMS
Program Power	300 Watts.
Sensitivity	93.6 dB, 2.83V @ 1m @ 2rt
Frequency range	25-4000 Hz
Recom. enclosure vol.	40/90 l 1.4/3.15 ft. <sup>3</sup>
Voice coil diameter	100 mm. 4 in.
Magnetic assembly weight	6.4 kg. 14.08 lb.
BL factor	17.2 N/A
Moving mass	0.077 kg.
Voice coil length	12 mm.
Air gap height	7 mm.
X damage (peak to peak)	28 mm.

## MOUNTING INFORMATION

Overall diameter	320 mm. 12.6 in.
Bolt circle diameter	300 mm. 11.8 in.
Baffle cutout diameter:	
-Front mount	286 mm. 11.26 in.
-Rear mount	280 mm. 11.02 in.
Depth	125 mm. 4.92 in.
Volume displaced by driver	5.5 l 0.19 ft. <sup>3</sup>
Net weight	7.4 kg. 16.3 lb.
Shipping weight	8 kg. 17.6 lb.

## MATERIALS

Basket	Die Cast aluminium
Cone	Paper
Surround	Polyurethane foam
Voice coil	Edgewound copper ribbon
Magnet	Ferrite

## THIELE-SMALL PARAMETERS\*\*

Resonant Frequency, $f_s$	29 Hz
D.C. Voice Coil Resistance, $R_e$	6.6 ohms.
Mechanical Quality Factor, $Q_m$	6.49
Electrical Quality Factor, $Q_{es}$	0.31
Total Quality Factor, $Q_t$	0.30
Equivalent Air Volume to Cms, $V_{as}$	154 l
Mechanical Compliance, $C_{ms}$	392 $\mu\text{m/N}$
Mechanical Resistance, $R_m$	2.16 $\text{kg/s}$
Efficiency, $\eta_0$ (%)	1.2
Effective Surface Area, $S_d(\text{m}^2)$	0.053 $\text{m}^2$
Maximum Displacement, $X_{max}$	3 mm.
Displacement Volume, $V_d$	160 $\text{cm}^3$
Voice Coil Inductance, $L_e$ @ 1kHz	1.3 mH

## NOTES

\*The power capacity corresponds to the RMS maximum value that can dissipate the loudspeaker when a sinus signal is applied for a period of at least two hours.

Program power is defined as the transducer's ability to handle normal music program material.

\*\* T-S parameters are measured after an exercise period using a preconditioning power test, using a velocity-current laser transducer, and will reflect the long term parameters, once the loudspeaker has been working for a short period of time.

## NOTAS

\*La potencia admisible corresponde a la máxima potencia RMS que puede disipar el altavoz durante al menos dos horas, cuando se le aplica una señal senoidal determinada.

Por potencia programa se entiende la capacidad del altavoz en el manejo de señales transitorias, como sería el proporcionado por el contenido de un pasaje musical normal.

\* Los parámetros T-S han sido medidos después de un período de fatiga y estabilización de las suspensiones, mediante transductor láser de velocidad-corriente, y son el reflejo de los parámetros a largo plazo del altavoz, una vez éste haya sido instalado y haya trabajado en un corto espacio de tiempo.

# ((10BR60)) LOW FREQUENCY

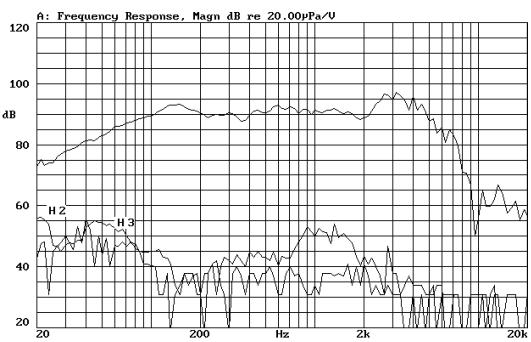

This 10" bass and mid bass loudspeaker has been specifically designed to deliver exceptional low and mid frequency reproduction, with high sensitivity and extremely low distortion. It incorporates a curvilinear cone attached to a rubber surround, in order to provide suspension stability and to allow maximum excursion linearity. By combining a powerful magnet construction with a cast aluminium basket, this model achieves high power capacity, and consequently, contributes to reduce the thermal power compression.

Modelo de 10" de bajas y medias frecuencias. Utiliza un cono curvilíneo con el fin de obtener una respuesta lineal, unido a una suspensión de goma sintética para evitar los problemas inherentes a las tradicionales suspensiones de espuma de poliuretano, sujetas a un envejecimiento muy marcado y con unas características mecánicas inestables. Esto se traduce en una respuesta impulsional muy rápida y unas variaciones insignificantes de los parámetros del altavoz con el transcurso del tiempo, lo que redundará en unos graves nítidos y profundos, de gran impacto, y unos medios naturales y de gran definición.

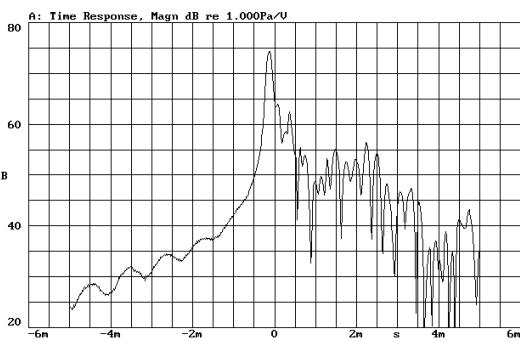

PREDICTED LOW FREQUENCY RESPONSE • Bass-reflex cabinet,  $V_b=40$  l,  $f_b=38$  Hz

# (( 8WOOFER/P )) LOW FREQUENCY

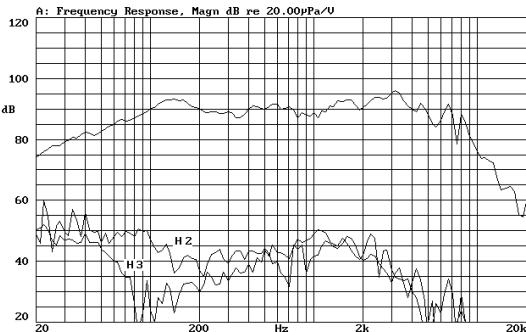

This 8" bass loudspeaker has its parameters optimised for a clean bass reproduction. It features a die cast aluminium basket, polypropylene cone with rubber surround and long excursion voice coil. This model may be fitted into bass-reflex or closed enclosures in high quality multi-way systems such as studio monitors and domestic cabinets.

Modelo de 8" con unas características excepcionales para alta fidelidad: membrana de polipropileno y suspensión de goma de gran elongación, chasis de aluminio fundido y estructura magnética de gran tamaño. El resultado son unos bajos de gran impacto y unos medios nítidos y naturales para recintos de tipo bass-reflex o herméticos.
